

**LG NeON<sup>®</sup> R**

LG355Q1C-A5

60 cell

The LG NeON<sup>®</sup> R is a high-power luxury solar panel featuring newly developed Back Contact Technology™. The advanced cell structure locates all of the module's electrodes on the back side of the panel, minimizing power loss and boosting efficiency.

#### Enhanced Warranties

LG offers a 25-year product warranty for LG NeON<sup>®</sup> R in addition to an enhanced performance warranty. After 25 years, LG NeON<sup>®</sup> R is guaranteed to produce at least 88.4% of its initial power output.

#### High Power Output

The LG NeON<sup>®</sup> R has been designed to significantly enhance its output, making it efficient even in limited spaces.

#### Roof Aesthetics

LG NeON<sup>®</sup> R has been designed with aesthetics in mind: the lack of any electrodes on the front creates an improved, modern aesthetic.

#### Outstanding Durability

With its newly reinforced frame design, LG NeON<sup>®</sup> R can endure a front load up to 6000 Pa, and a rear load up to 5400 Pa.

#### Improved Performance on Sunny Days

LG NeON<sup>®</sup> R now performs better on sunny days, thanks to its improved temperature coefficient.

#### Near Zero LID (Light Induced Degradation)

The n-type cells used in LG NeON<sup>®</sup> R have almost no boron. This leads to less LID right after installation.

#### About LG Electronics

LG Electronics is a global player who has been committed to expanding its capacity, based on solar energy business as its future growth engine. We embarked on a solar energy source research program in 1985, supported by LG Group's rich experience in semi-conductor, LCD, chemistry, and materials industry. We successfully released first Mono X<sup>®</sup> series to the market in 2010, which were exported to 32 countries in the following 2 years, thereafter. In 2013, NeONTM (previously known as Mono X<sup>®</sup> NeON) & 2015 NeON2 with CELLO technology won "Intersolar Award", which proved LG is the leader of innovation in the industry.
